## Cosmos & Orbits

Of all the subject matter in the world, the cosmos seems to me to have infinite possibilities. Our immediate neighbors in the universe, our sun and our moon shed light, and our relationship is in constant orbit.

So, from an artist's perspective light = colour, and orbiting = movement. Paul Klee (1879-1940) famously stated that 'Art does not reflect what is seen, rather it makes the hidden visible'. Sometimes, especially for things that are in plain sight.

In daylight or nightlight we exist in the cosmos... and my challenge is to make art works to be reminders of this reality, to 'make visible.'

The inspiration comes from the perspective of Latitude 35°S x Longitude 139°E, that is, my own back yard.
